

Dear Soundscape Users

We are ready to launch Soundscape V6 which represents the beginning of a new era for Soundscape. I want to thank you for your patience; I know that this has been a long time coming. I hope that the new capabilities will be valuable for you. If you have a Mixpander card you will be able to download V6 free of charge and try it out; it's limited to 16 tracks. If you like it, you can purchase the license and enable full capabilities.

Soundscape V6 will join the other products developed by the Sydec team (Alpha-Link, Delta-Link, MadiXtreme and MX4) since Sydec became part of the SSL Group in 2006, as mainstream SSL products. Consequently we are moving all the information about Soundscape and the plug-ins to the main SSL website (www.solidstatelogic.com). We have tried to make it easy for you to find all the resources that have been available to you through the Sydec site via the SSL site. I am particularly pleased that we are able to migrate the complete Soundscape forum; we regard the effective community that you have jointly developed as a great example of the way users and developers should work together. I hope that we can build on that in the future and learn from the attitudes and behaviours exhibited there.

We have plans for the future of Soundscape. These are oriented around professional applications of what we believe to be one of the most robust and capable digital audio workstations. We are grateful to the beta testers who have helped us get Soundscape V6 into excellent shape and we now look forward to getting feedback from a wider audience. We hope that we will be able to substantially grow the user base over the coming months.

For users of any legacy Soundscape system we also have great upgrade bundle deals that include SSL hardware and will be available directly from our webshop.

Right now the Soundscape Web shop and Forum are closed whilst we do a final import of your data into the SSL system and do some final testing... the shop and forum will re-open at the SSL web site by Weds 26th May.

Welcome to the SSL family
Kind regards

Antony David
Managing Director
Solid State Logic
